## Introducing *The Find Out Files* Activity Book Series

**A new workbook series helps children explore  
what it means to be themselves.**

Magination Press's new activity book series, *The Find Out Files*, releases in May. For fans of Magination Press's bestselling *What to Do* series, these books include fun activities, interactive crafts, humorous illustrations, and loads of stickers to help kids learn about themselves, their emotions, and their families.

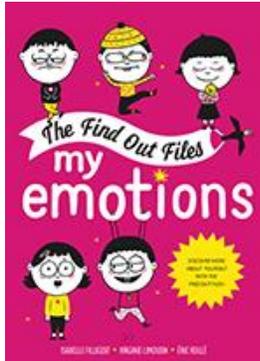

These interactive books support emotional regulation for kids—promoting social-emotional learning and healthy familial relationships. Like all Magination Press books, these books are written and vetted by psychologists. Isabelle Filliozat is a licensed psychotherapist and has published over 30 books on parenting that have been translated into 26 different languages.

The four books in the series include a Reader's Note written for adults with information, tools, and tips for exploring the topics with their children.
